

ALUMINIUM RADIATORS

[®] **GLOBAL** 
R A D I A T O R I

Unique: in size and strong personality. Unique: in the alternative design and character, but flexible in low areas.

The radiator that is positioned even under large windows and lets light and heat fuse together. A unique radiator for a warm embrace.

HIGH THERMAL OUTPUT Guaranteed by certification, according to the norm EN 442, from the *Politecnico* in Milan. The high thermal output allows less bulky radiators to be installed.

ENERGY SAVING WITH MAXIMUM COMFORT With the Global radiators the regulation of the temperature is easy and inexpensive. An ideal temperature for every environment according to personal needs is rapidly achieved.

VERY LONG DURATION Thanks to the high quality of the material, that gives the maximum guarantee of resistance and duration. The double protection in the "anaphoresis-bath" followed with epoxy power enameling guarantees a perfect and durable finish.

EASIER INSTALLATION Due to the lightness of the aluminum and the sectional elements that allow greater ease and flexibility of installation.

CERTIFIED QUALITY AND ENVIRONMENTAL The ICIM certified on 1994 (norm ISO 9001:2000) the Quality System and on 2001 (norm UNI EN-ISO 14001) the System of Environmental Management.

GLOBAL provides a 10 year warranty from the production date

(stamped on the side of each sections)
The conventional warranty grants the sole right to free replacement of the radiator which, due to defects originating from defects in material or workmanship, is not fit for purpose or its ordinary intended use. Replacement radiators shall be delivered free of charge to the retailer who sold the radiator to the end customer or his installer.

The warranty is valid on the condition that the installation and the system to which the product is connected are performed by qualified/authorised personnel to top workmanship standards and in compliance with the regulations and requirements of the sector in force; it is also valid on the condition that there has been full compliance with warnings and instructions for proper installation, use and maintenance of the product indicated in the technical documentation under the paragraph entitled *correct installation, use and maintenance instructions*, available and downloadable from the **TECHNICAL INFO** section on the globalradiatori.it website. The warranty is regulated by further conditions indicated in the technical catalogue and the CONVENTIONAL WARRANTY section on the globalradiatori.it website.

model	dimensions mm				Ø connection	dry weight approx. Kg	water content litres	heat output EN 442		exponent n	coefficient Km
	A	B	C	D				ΔT 50°C	ΔT 30°C

* 1 Watt = 0,863 Kcal/h

The heat output is certified by the Institute of engineering Politecnico in Milano according to the norm EN 442.

EXAMPLE FOR A DIFFERENT ΔT FROM ΔT 50°C

If you need to know a radiator heat output (P) with different ΔT from ΔT 50°C, use the following characteristic equation: $P = K_m \cdot \Delta T^n$

Example for the 600 model with ΔT = 60°C → $P = 0,80367 \cdot 60^{1,32879} = 185$ Watt

EXAMPLE OF HEAT OUTPUT READINGS WITH DIFFERENT ΔT FROM ΔT 50°C

model	ΔT 20°C	ΔT 25°C	ΔT 30°C	ΔT 35°C	ΔT 40°C	ΔT 45°C	ΔT 50°C	ΔT 55°C	ΔT 60°C
GL 800/80	54	73	93	114	136	159	183	207	233
GL 700/80	49	66	84	103	123	144	166	189	212
GL 600/80	43	58	74	91	108	126	145	165	185
GL 500/80	37	50	64	79	94	110	126	143	161
GL 350/80	29	39	49	60	72	84	97	110	123
GL 350/80/D	47	63	80	98	117	137	157	178	200
GL 200/80/D	31	41	53	64	77	90	103	117	131

The expected heat output is obtained by observing the distances specified below:

≥ cm 3 from the wall

≥ cm 10 from the floor

≥ cm 10 from the shelf or window-sills

In order to prevent the thermal expansion of the system from causing noise in correspondence with the heaters, it is advisable to use plastic brackets to support the radiators (items A004, A025, A027 or A029 in our catalogue).

CORRECT INSTALLATION, USE AND MAINTENANCE INSTRUCTIONS

- ✗ The GL radiators can be used in all hot water or vapour heating installations up to 110°C with a working pressure up to 1600 K Pascal - 16 bar.
- ✗ They can be installed in systems with iron, copper or thermoplastic pipes.
- ✗ In order to protect the system from scaling and corrosion processes, which affect radiators, pipes and boilers, the UNI-CTI 8065 Standard provides for the treatment of the filling water of the system, without distinguishing between aluminium, steel or cast iron.
- ✗ Among the various products to be added to the system in accordance with the abovementioned UNI Standard, there is a specific one for aluminium, an aliphatic film-forming polyamine marked under the name Cillit-HS 23 Combi in the quantity recommended by the manufacturer. However, it is useful to check the pH value of the water, which should preferably be between 6.5 and 8.
- ✗ It is recommended to install automatic air vent valves on each radiator.
- ✗ Avoid closing the radiator shut-off valves completely in order to allow any gas that may be inside the radiators to escape through the automatic air vent valve that is compulsory in every heating system, thus avoiding possible overpressure that could damage the radiators.
- ✗ If one or more batteries are to be excluded from the circuit, an automatic air vent must be fitted to each battery.
- ✗ For a good preservation of the paint, it is necessary that the radiators, before and after installation, are not kept in very humid environments (inside showers, in saunas, in Turkish baths, near swimming pools, etc.). If paint comes off at one point on the radiator, aluminium oxide can form and cause the paint to peel off completely. Do not use porous clay humidifiers.
- ✗ To clean the outside of the radiator, do not use abrasive or chemically corrosive/aggressive products of any kind, as the use of water and neutral detergents is sufficient and the operation must be carried out when the radiator is cold to preserve the original brilliance of the paint over time.
- ✗ Do not place weights and/or objects on the radiators. Do not use radiators for any purpose other than as a heater (e.g.: as a bench/stand, ladder, to store furniture or objects).

ACCESSORIES

A001 galvanized straight bracket

ANGLE BRACKET

A003 galvanized
A004 white plastic

A025 170 mm white expansion plug bracket (pair)

A026 195 mm white expansion plug bracket (pair)

A027 universal brackets white blister pack (pair)

A029 square brackets white blister pack (pair)

WHITE WALL BRACKET

A033 800 mm
