

# mix

ALUMINIUM RADIATORS

# mix

Combining lightness and simplicity, Mix is an aluminium radiator that is part of the Global range linking modern elegance to comfort. Thanks to our lengthy experience of working with aluminium, our designers, engineers and technical staff are able to obtain results of the highest quality.

**HIGH THERMAL OUTPUT** Guaranteed by certification, according to the norm EN 442, from the *Politecnico* in Milan. The high thermal output allows less bulky radiators to be installed.

**ENERGY SAVING WITH MAXIMUM COMFORT** With the Global radiators the regulation of the temperature is easy and inexpensive. An ideal temperature for every environment according to personal needs is rapidly achieved.

**VERY LONG DURATION** Thanks to the high quality of the material, that gives the maximum guarantee of resistance and duration. The double protection in the "anaphoresis-bath" followed with epoxy power enameling guarantees a perfect and durable finish.

**EASIER INSTALLATION** Due to the lightness of the aluminum and the sectional elements that allow greater ease and flexibility of installation.

**CERTIFIED QUALITY AND ENVIRONMENTAL** The ICIM certified on 1994 (norm ISO 9001:2000) the Quality System and on 2001 (norm UNI EN ISO 14001) the System of Environmental Management.

## GLOBAL provides a 10 year warranty from the production date

(stamped on the side of each sections)  
The conventional warranty grants the sole right to free replacement of the radiator which, due to defects originating from defects in material or workmanship, is not fit for purpose or its ordinary intended use. Replacement radiators shall be delivered free of charge to the retailer who sold the radiator to the end customer or his installer.

The warranty is valid on the condition that the installation and the system to which the product is connected are performed by qualified/authorised personnel to top workmanship standards and in compliance with the regulations and requirements of the sector in force; it is also valid on the condition that there has been full compliance with warnings and instructions for proper installation, use and maintenance of the product indicated in the technical documentation under the paragraph entitled *correct installation, use and maintenance instructions*, available and downloadable from the *TECHNICAL INFO* section on the [globalradiatori.it](http://globalradiatori.it) website. The warranty is regulated by further conditions indicated in the technical catalogue and the CONVENTIONAL WARRANTY section on the [globalradiatori.it](http://globalradiatori.it) website.

Model	dimensions mm				Ø connection	dry weight approx. Kg	water content litres	heat output EN 442		exponent n	coefficient Km
	A	B	C	D				ΔT 50°C	ΔT 30°C		
	overall height	width	depth	pipe centres				Watts	Watts		
MIX 800	890	80	95	800	1"	2,16	0,60	<b>180</b>	91	1,32575	1,00414
MIX 700	790	80	95	700	1"	2,02	0,54	<b>161</b>	82	1,32420	0,90443
MIX 600	690	80	95	600	1"	1,65	0,48	<b>142</b>	72	1,32266	0,80314
MIX 500	590	80	95	500	1"	1,61	0,40	<b>123</b>	63	1,32111	0,70003
MIX 350	440	80	95	350	1"	1,13	0,36	<b>94</b>	48	1,31878	0,54003
MIX 300	390	80	95	300	1"	1,00	0,33	<b>82</b>	43	1,28408	0,54198

\* 1 Watt = 0,863 Kcal/h

The heat output is certified by the Institute of engineering *Politecnico* in Milano according to the norm EN 442.

#### EXAMPLE FOR A DIFFERENT ΔT FROM ΔT 50°C

If you need to know a radiator heat output (P) with different ΔT from Δt 50°C, use the following characteristic equation:  $P = Km \cdot \Delta T^n$

Example for the Mix 600 model with  $\Delta T = 60^\circ C \rightarrow P = 0,80314 \cdot 60^{1,32266} = 181 \text{ Watt}$

#### EXAMPLE OF HEAT OUTPUT READINGS WITH DIFFERENT ΔT FROM ΔT 50°C

Model	ΔT 20°C	ΔT 25°C	ΔT 30°C	ΔT 35°C	ΔT 40°C	ΔT 45°C	ΔT 50°C	ΔT 55°C	ΔT 60°C
MIX 800	53	72	91	112	134	156	<b>180</b>	204	229
MIX 700	48	64	82	100	120	140	<b>161</b>	182	205
MIX 600	42	57	72	89	106	123	<b>142</b>	161	181
MIX 500	37	49	63	77	92	107	<b>123</b>	139	156
MIX 350	28	38	48	59	70	82	<b>94</b>	107	120
MIX 300	25	34	43	52	62	72	<b>82</b>	93	104

The expected heat output is obtained by observing the distances specified below:

≥ cm 3 from the wall

≥ cm 10 from the floor

≥ cm 10 from the shelf or window-sills

In order to prevent the thermal expansion of the system from causing noise in correspondence with the heaters, it is advisable to use plastic brackets to support the radiators (items A004, A025, A027 or A029 in our catalogue).

#### CORRECT INSTALLATION, USE AND MAINTENANCE INSTRUCTIONS

- ▲ The Mix radiators can be used in all hot water or vapour heating installations up to 110°C with a working pressure up to 1600 K Pascal - 16 bar.
- ▲ They can be installed in systems with iron, copper or thermoplastic pipes.
- ▲ In order to protect the system from scaling and corrosion processes, which affect radiators, pipes and boilers, the INI-CTI 8065 Standard provides for the treatment of the filling water of the system, without distinguishing between aluminium, steel or cast iron.
- ▲ Among the various products to be added to the system in accordance with the abovementioned UNI Standard, there is a specific one for aluminium, an aliphatic film-forming polyamine marked under the name Cillit-HS 23 Combi (recommended dosage: 1 litre for every 200 litres of water circulating in the system). However, it is useful to check the pH value of the water, which should preferably be between 6.5 and 8.
- ▲ It is recommended to install automatic air vent valves on each radiator.
- ▲ Avoid closing the radiator shut-off valves completely in order to allow any gas that may be inside the radiators to escape through the automatic air vent valve that is compulsory in every heating system, thus avoiding possible overpressure that could damage the radiators.
- ▲ If one or more batteries are to be excluded from the circuit, an automatic air vent must be fitted to each battery.
- ▲ For a good preservation of the paint, it is necessary that the radiators, before and after installation, are not kept in very humid environments (inside showers, in saunas, in Turkish baths, near swimming pools, etc.). If paint comes off at one point on the radiator, aluminium oxide can form and cause the paint to peel off completely. Do not use porous clay humidifiers.
- ▲ To clean the outside of the radiator, do not use abrasive or chemically corrosive/aggressive products of any kind, as the use of water and neutral detergents is sufficient and the operation must be carried out when the radiator is cold to preserve the original brilliance of the paint over time.
- ▲ Do not place weights and/or objects on the radiators. Do not use radiators for any purpose other than as a heater (e.g.: as a bench/stand, ladder, to store furniture or objects).
